MANUFACTURING SITE

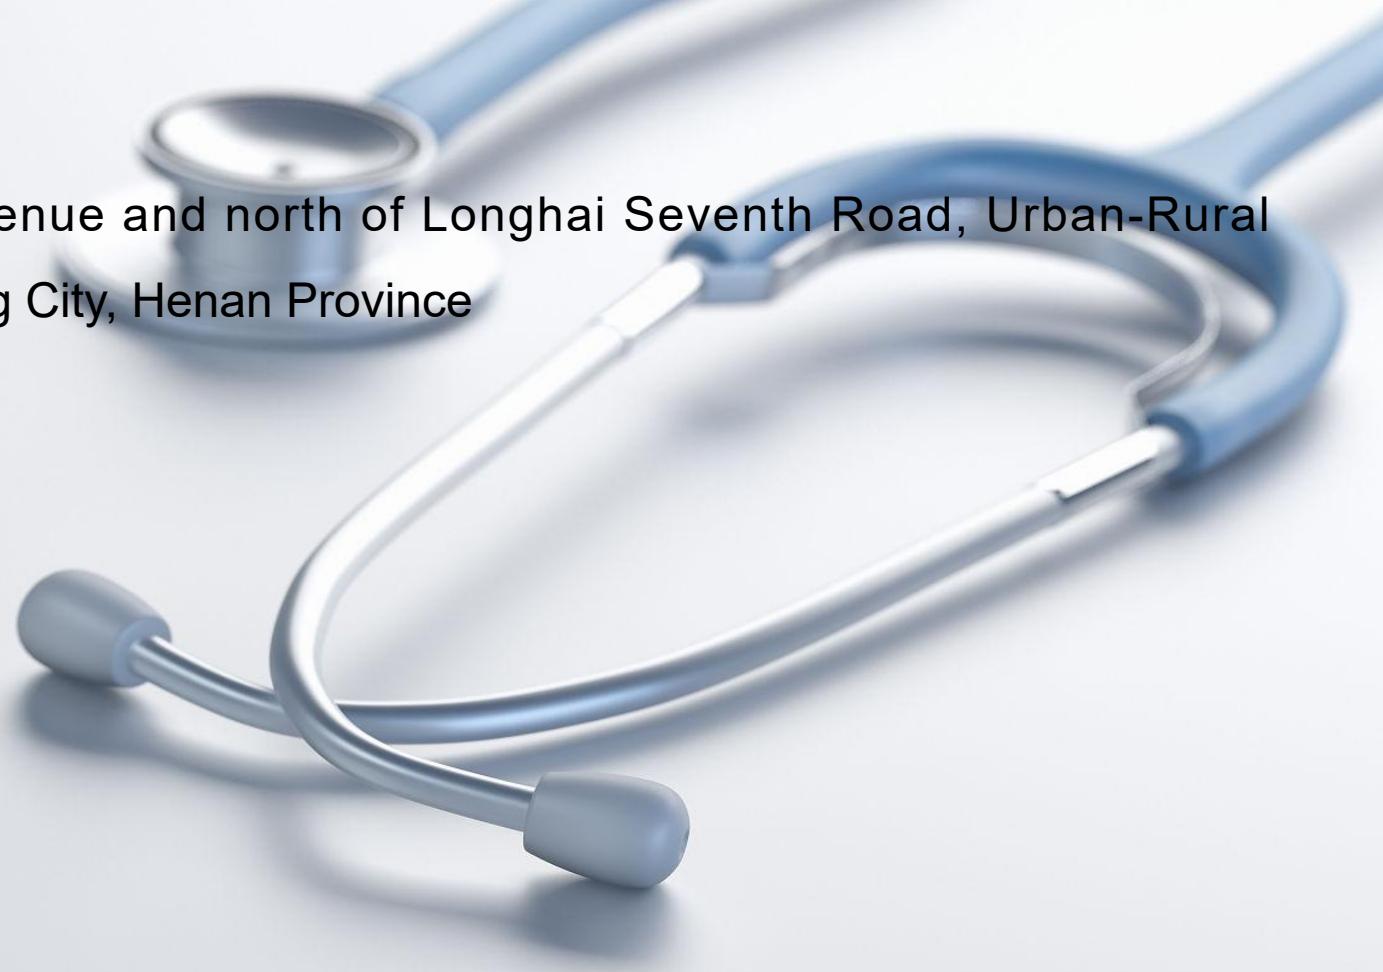

01

Manufacturing Site

- Project location: west of Seventh Avenue and north of Longhai Seventh Road, Urban-Rural Integration Demonstration Zone, Kaifeng City, Henan Province
- Planning content: Industry
- Economic and technical indicators:
 - Total planned land: 26,864.8m²
 - Total building area: 28,270.72m²
 - Gross floor area: 27,645.40m²
 - Building density: 33.59%
 - Building coefficient: 35.18%
 - Floor area ratio: 10,300m²/ha
 - Green space rate: 10.5%
- Building numbers for this announcement: Building 1# (factory), Building 2# (office building), Building 3# (comprehensive building), Building 5# (factory), Building 6# (factory)

Nation-wide Investment Promotion

Master Planning

- department planning
- professional medical care
- basic medical care
- project portfolio

Rehabilitation Equipment

- neurological rehab
- pediatric rehab
- orthopedic rehab
- pain rehab
- traditional Chinese medicine (TCM) rehab
- health care center
- autism center
- sleep center
- preventive treatment center

Household Appliances

- transcranial magnetic stimulator
- ultrasonic targeted drug delivery device
- finger rehab robot
- air wave therapy device
- pelvic floor muscle therapy device
- hypertension therapy device
- diabetes therapy device

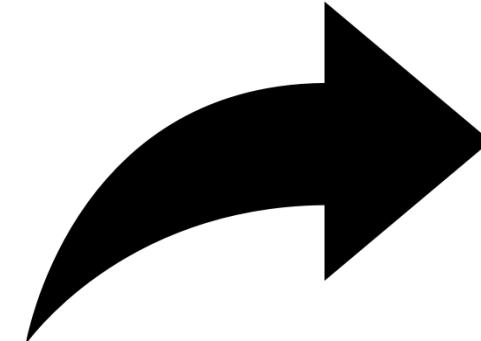

Other Electronic Products

- head massager
- eye massager
- neck massager
- womb warming patch
- steam eye mask
- eye ice patch

MAIN PRODUCTS

02

01 Transcranial Magnetic Stimulator

The transcranial magnetic stimulator is equipped with four built-in treatment modules which are suitable for related diseases.

Ischemic cerebrovascular diseases: cerebral thrombosis, lacunar infarction, vascular dementia, cerebral insufficiency, cerebral arteriosclerosis, epilepsy.

Related neurological and psychiatric disorders, such as migraine, neurasthenia, insomnia, cognitive dysfunction, Alzheimer's disease, brain atrophy, depression, brain fatigue syndrome.

Pediatric cerebral palsy-related diseases: disorders of movement, posture, intelligence, language, auditory-visual perception, growth, dental development, emotion and behavior.

Cranial trauma-related diseases, such as concussion, cerebral contusion and sequelae of brain injury, recovery period of cerebral hemorrhage, hypoxic and toxic damage to the brain.

Applicable departments and institutions: psychiatry, psychology, neurology, neurosurgery, rehabilitation and physiotherapy, pediatrics, acupuncture, veteran cadres wards, disabled persons' federations at all levels, special education schools, welfare institutions, etc.

02 Ultrasound Cerebrovascular Treatment Instrument

Indications:

Cerebrovascular diseases: cerebral infarction, cerebral insufficiency, dizziness, tinnitus, limb numbness, recovery period of cerebral hemorrhage.

Movement disorders: dystonia, tremors, flaccid paralysis, spastic paralysis, muscular atrophy and post-stroke movement disorders.

Prevention and treatment of muscle and skin pain caused by various reasons, ablation of carotid artery plaque.

Applicable departments and institutions: Neurology department, neurosurgery department, rehabilitation department, geriatrics department, and veteran cadres rehabilitation center.

03 Ultrasound Low-Frequency Electrotherapy Apparatus

Indications:

Cerebrovascular diseases:
cerebral infarction,
cerebral insufficiency,
dizziness, tinnitus, limb
numbness, recovery period
of cerebral hemorrhage.
Prevention and treatment
of muscle and skin pain
caused by various reasons,
ablation of carotid artery
plaque.

Movement disorders:
dystonia, tremors, flaccid
paralysis, spastic paralysis,
muscular atrophy and
post-stroke movement
disorders.

Applicable departments and institutions: Neurology department, neurosurgery department,
rehabilitation department, geriatrics department, and veteran cadres rehabilitation center.

treatment

04 hypertension therapy Apparatus

Indications:

Hypertension-induced coronary heart disease, arrhythmia, heart failure, and hypertensive heart disease.

Hypertension-induced brain damage, cerebral thrombosis, cerebral hemorrhage, and cerebral infarction.

Hypertension-induced renal failure, renal atrophy, and renal failure.

Hypertension-induced eye diseases and fundus hemorrhage.

Hypertension-induced headaches, insomnia, and limb dysfunction caused by stroke.

class A medical insurance reimbursement

primary treatment

Applicable departments and institutions: Neurology department, neurosurgery department, rehabilitation department, geriatrics department, and veteran cadres rehabilitation center.

05 TCM targeted Transdermal Drug Delivery Therapy Apparatus

Indications:

This product is suitable for percutaneous drug introduction therapy.

Clinical application in bone injury and pain rehabilitation.

(cervical spondylosis, frozen shoulder, bone hyperplasia, lumbar disc herniation, sciatica, acute lumbar sprain, fracture, myofibrosis, costal osteoarthritis, aseptic necrosis of femoral of the femoral head, neck, shoulder, waist, lumbar and leg pain, femoral arthritis, rheumatoid arthritis, gouty arthritis)

Applicable departments: neurology, neurosurgery, rehabilitation, respiratory medicine, gastroenterology, gynecology, urology, dermatology

exclusive product

class A medical insurance reimbursement

effective drug permeability

06 Arteriosclerosis Detector

Indications:

People aged 20 or above who have been diagnosed with hypertension, hyperlipidemia, diabetes, coronary heart disease, or stroke.

People with high risk factors for cardiovascular and cerebrovascular diseases such as family history of early-onset cardiovascular and cerebrovascular diseases, obesity, long-term smoking, high-fat diet, and lack of physical exercise.

People with long-term symptoms such as dizziness and discomfort but have not yet been clearly diagnosed.

Healthy individuals who have experienced early discomfort symptoms such as chest tightness and palpitations after activities or at rest but have not yet been diagnosed.

07 Weisenbo Comprehensive Treatment Device (postpartum rehabilitation)

Indications:

postpartum lactation promotion, insufficient milk secretion, blocked breast ducts, postpartum uterine involution, postpartum ovarian recovery, chronic pelvic inflammatory disease, breast lobular hyperplasia, postpartum urination promotion.

Applicable departments: rehabilitation department, gynecology department, postpartum care center, etc.

08 Musical Gastrointestinal Therapy Apparatus

Indications:

chronic gastritis, gastric ulcer, duodenal bulb ulcer, stomach pain, stomach acid, stomach distension, gastrointestinal motility disorders, gastrointestinal rhythm disorder syndrome, chronic nonspecific colitis, ulcerative, colitis, proctitis, chronic diarrhea, dysentery, dawn diarrhea, irritable bowel syndrome, intestinal adhesions, abdominal distension and pain, irregular bowel movement, constipation, unsafe intestinal obstruction caused by various abdominal surgeries, acute and chronic appendicitis, appendicitis abscess mass, irritable bowel syndrome, postoperative gastroparesis, postoperative intestinal dysfunction, intractable nausea and vomiting after chemotherapy, postoperative flatulence, postoperative constipation symptoms, functional dyspepsia, nausea and vomiting, intestinal dysfunction, other functional gastrointestinal diseases or postoperative syndromes, gastrointestinal symptoms existing after the healing of digestive system ulcers, abnormal electrogastrogram manifestations, such as tachygastria, bradygastria, and gastric rhythm disorder. Hypertension-induced brain damage, cerebral thrombosis, cerebral hemorrhage, and cerebral infarction.

Applicable departments: Gastroenterology, Geriatrics, General Surgery, Urology, Hepatobiliary Surgery, Neurosurgery, Orthopedics, Neurology, Traditional Chinese Medicine, Rehabilitation and Physiotherapy, Gastroenterology, Anorectal Surgery, Oncology, Obstetrics and Gynecology, Endocrinology, Intensive Care Unit, Preventive Medicine, etc.

10 Sleep-Aiding and Stress-Relief Instrument

A must-have for sleep centers.

- TMS technology - certified by the US FDA
- Effectively improve sleep - relieve psychological stress
- Non-invasive anxiety and stress detection system
- Zero-gravity floating and bio-light wave intervention system
- OMS air pressure hot compress system for leg and foot muscles
- Low-frequency deep somatosensory stress relief (AR) conditioning system.
- Negative oxygen ion forest oxygen bar system
- Brain wave traction sleep-promoting system

11 Eye Massager

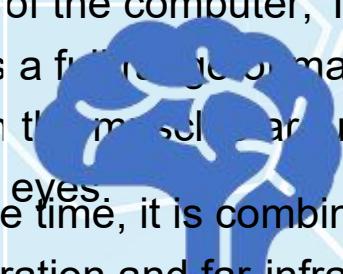

The new generation of eye massager from Chinal adopts microcomputer chip control technology for full humanized simulation control, adds the new concept of air pressure simulation active massage and applies it to

Under the control of the computer, The air pressure performs a full circle massage and adjustment on the muscle around the eyes.

At the same time, it is combined with the internal vibration and far-infrared heating functions to relieve and regulate eye soreness, eye pain, and eye fatigue.

12 Pelvic Floor Muscle Rehabilitation Device

- The pelvic floor muscle rehabilitation device, also known as a vaginal dumbbell or Kegel ball, helps strengthen the vaginal muscles through the principles of Kegel exercises. This product is specifically designed for women and aligns with the physiological structure of the female vagina.
- It is simple to use. Place the vaginal dumbbell about 2cm inside the vaginal opening, get accustomed to holding it, and then engage in activities such as sitting, walking, or climbing stairs for exercise. Keep doing this for 15-20 minutes every time.
- This product enhances the functionality of the pelvic floor active support system and serves as an auxiliary tool for pelvic floor muscle training. It is beneficial for individuals experiencing urinary incontinence and various types of pelvic floor dysfunction, as it can strengthen pelvic floor muscles, improve blood circulation, and maintain long-term rehabilitation effects.

03

ADVANTAGES

The company currently holds **15** medical device product registration (filing) certificates, **10** electronic product filing certificates, and **18** patent certificates. It has jointly established the Zhengzhou Health Engineering Research Institute with Zhengzhou Health Vocational College, focusing on the research and development of new medical products.
